Re: **U.S. Patent Application No. 09/168,072**
Title: LOW/MAX CARD GAME METHOD
AND APPARATUS
Inventor: Nick MARCHESANI
Our Reference No.: 82022-0101

Dear Nick and Joanne:

Enclosed for your files is a copy of an Office Action (non-final) dated February 8, 2008, with references cited by the Examiner, received from the U.S. Patent and Trademark Office.

The Examiner has withdrawn the earlier rejection but unfortunately, has continued to reject the application in view of the Breeding and Marquez references (enclosed). We can study these if you like and suggest a proposed response.

A response is due May 8, 2008, which may be extended until August 8, 2008, with payment of the appropriate extension fees. The estimated costs for us reviewing the references and drafting a response will be in the order of \$5,000.

Please let us know if you have any comments or instructions for responding to the Office Action.

We wish to remind you of Applicants' continued duty to disclose all information which is material to the patentability of the claims. If you are aware of relevant prior art which should be considered by the Examiner, please let us know immediately.

DETAILED ACTION

Applicant's affidavit filed 11/21/07 states his date of invention as early as 5/6/98 and provides evidence in exhibit A. The examiner questions the authenticity of this document since its body is type written and the first and last pages containing the dates are hand written and appear to have been appended to the document. However, exhibit C dated 8/5/1998 showing an attorney communication regarding their "Reference: 2413-101" does not appear to be in question. This date is considered to establish an earlier effective date than 8/25/98 to Srichayaporn and the grounds for rejection has been removed.

Claim Rejections - 35 USC § 103

Claim 28, 31, 32, 33, 34, 37, 38, 39, 40, 41, 43-47, 57, 59-361 are rejected under 35 U.S.C. 103(a) as being unpatentable over Breeding 5,248,142 in view of Marquez 5,294,128.

As to claims 28, 33 and 57 Breeding shows a standard deck of cards (col. 4, ln. 33), dealing seven cards (as claimed from 3 to 7), each player making a single wager and placing a single wager prior to viewing cards (col. 5, ln. 13). In Breeding, he splits his cards into a two card and a five card hand and each hand must out rank the spit hands of the dealers. With respect to the number of cards in each hand to "not exceed the total number...by more than one, Marquez teaches in splitting six dealt cards into a one card high hand, two card high hand and three card low hand. He teaches that the number of cards and divided hands is "preferable" (col. 2, ln. 65). Here Marquez teaches that the number of cards and divided hands in a game like that of Breeding is
